

Environmental Policy Statement

We are dedicated to contribute to the enhancement and sharing of knowledge within the globe by printing superior quality books. In line with this purpose, we are also committed to protect the environment and prevent pollution while doing our daily work.

As paper, ink and chemicals are our primary raw materials, we continually develop our system to procure these materials from environmentally responsible suppliers/manufacturers. And we continually look for means of reducing waste in all areas.

We comply with all applicable regulatory, statutory, customer and other requirements.

We are committed to maintain and improve our environment-friendly culture by setting up, reviewing and updating clear and practical environmental targets and objectives.

MOHAMED AL ZEERA

Managing Director
